

Super Dave Moving COVID-19 Cleanliness Checklist

**We are families serving other families.
Lets all do what it takes to keep everyone safe.**

Continuously being updated by trusted & credible sources

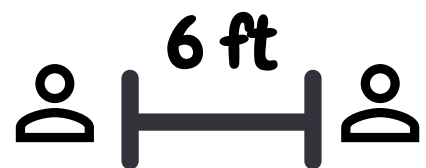

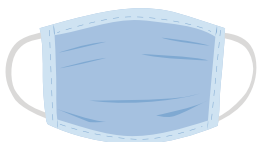

We constantly adapt to any guideline updates that the CDC & the WHO make.

**Crew in protective gear/practicing hand hygiene/
social distancing**

All crew members are required to wear face masks and practice social distancing.

Clients must also practice these protective measures. The best way to protect everyone is by everyone protecting themselves appropriately. These rules do not apply just to those on the job, they apply to everyone that is present for the service.

- The team is also following CDC-recommended hand washing protocol, and have been instructed on other ways to limit the spread of germs, such as not touching their face, sneezing into elbow, and staying home if feeling sick.

Sanitation Stations

Hand sanitizer (at least 60%-95% alcohol content) or effective disinfectant is available to the crew members.

These can be found:

- in the truck

Monitoring of symptoms

- All crew members are directed to declare their condition, especially if they are displaying symptoms of COVID-19, have been in close contact with a person who has COVID-19, or have been tested for COVID-19.
